

# The 'BlockMaster' the preferred sprayer for turf specialists & hobby farmers..

The BlockMaster is designed to be pulled by an ATV (4 wheeler), a utility or even a small tractor for spraying small to medium sized blocks, golf courses etc. Available in three handy sizes, 100lt, 200lt or 400lt. The BlockMaster has either a fixed, 4m or 6m folding boom for covering the ground quickly, together with a spray-lance & a length of self-store hose for spot-spraying. Complete with a 50mm tow ball coupling & wiring loom with switchbox the BlockMaster is ready to spray. Simply hook it up & get into those troublesome weeds today!

## THE BLOCKMASTER COMES STANDARD WITH THE FOLLOWING FEATURES:

**BOOM:** 4m or 6m crossfold boom with spring loaded breakaways or a 1.5m fixed boom that sprays up to 4.5m. Nozzle bodies are mounted on stainless steel brackets behind the boom giving complete protection. In-line taps are fitted as standard to allow boom sections to be turned on or off. Booms are plumbed with TeeJet non-drip nozzle bodies - when you switch the pump off, the nozzles instantly stop & the liquid in the pipe doesn't keep dripping out.

**PUMP:** 12 volt Flojet 13.6lt per minute diaphragm pump. Large capacity pump to run up to a 6m boom. Santoprene diaphragm & viton valves ensures maximum chemical resistance. The pump is mounted beneath the tank so it is flood primed. This pump features an internal bypass as well as a pressure cut-out switch. This means that the pump can be used as an on-demand pump for spot-spraying applications and will also run at a constant pressure when using the boom, which eliminates the need for an extra pressure regulating valve.

**TANK:** UV stabilized polyethylene tank with a large sump for complete drainage. Tank features a drain valve directly out of the bottom of the tank, allowing you to easily drain any excess spray into another container & flush the BlockMaster with clean water after each use.

**WHEELS:** Large ATV flotation tyres provide a smooth ride with minimum ground damage. Heavy duty hubs and 50mm axles easily carry the weight.

**PRESSURE GAUGE:** A glycerine dampened pressure gauge is flush mounted in the tanks frame, giving you an accurate pressure reading at a glance.

**GUN:** TeeJet spray lance with a long extension to keep the spray away from you. Spray lance has a trigger lock & an adjustable nozzle to change the spray pattern from a wide cone to a straight jet. Polyurethane self-store hose

is included for spot spraying.

**FRAME:** 50x50x3mm RHS Australian Made Dualgrade Smorgon Steel - not cheap imported steel. Fully welded frame. Standard 50mm tow coupling. 50x50x5mm angle boom mounting frame for easy boom height adjustment.

**FILTER:** TeeJet suction filter with 50 mesh screen to guard against pump damage and clogged/blocked valves. The filter features an isolation tap so that the filter can be cleaned when the tank still has liquid in it.

**WIRING:** 4mm twin core wiring loom complete with switchbox & alligator clips for easy connection to the ATV/vehicle battery.

**FINISH:** Trailer & boom are primed with etch primer & finished with the highest quality two pack paint for excellent chemical resistance & a hard rich finish.

## BlockMaster pricing as follows (all prices incl. GST):

### 100lt Unit with

Fixed Boom: \$2,226.00    4m Boom: \$2,385.00

### 200lt Unit with

Fixed Boom: \$2,785.00  
4m Boom: \$3,435.00    6m Boom: \$3,680.00

### 400lt Unit with

Fixed Boom: \$3,290.00  
4m Boom: \$3,945.00    6m Boom: \$4,185.00

**Options:** Single Sided Foam Marker Kit \$880 incl. GST
