

The versatile, reliable 'Junior' Range of Sprayers from Stoll Boomsprays.

The Junior Range of 12 volt sprayers are a multi-purpose sprayer that can be used for applications such as spot-spraying, running a small boom to spray around sheds, stockyards or any small areas, spraying firebreaks, treating grain or even inoculating silage or hay.

The Juniors are available in 100lt, 200lt, 400lt & 600lt sizes and with a few simple options available they make a very versatile unit that are perfect for the farmer or small acreage owner.

JUNIOR'S HAVE THE FOLLOWING FEATURES AS STANDARD:

Tank: UV stabilized polyethylene tank with a large sump for complete drainage. Tank features a drain valve directly out of the bottom of the tank, which is important because you can easily drain any excess spray into another container & flush the system with clean water after use.

Filter: External TeeJet suction filter to guard against pump damage & clogged/blocked valves. An important feature is the isolation tap which allows the filter to be cleaned when the tank still has liquid in it.

100lt Units: Flojet 12 volt 7.6lt per min diaphragm pump. The pump features a pressure cut-out switch for on-demand spraying when using the spray lance (motor only runs when you activate the trigger) & an internal bypass for constant pressure if using a small boom or grain spraying attachment.

200lt, 400lt & 600lt Units: Flojet 12 volt 13.6lt per min diaphragm pump that has all the features of the 7.6lt per min but with enough extra flow to run up to a 6m boom. Santoprene diaphragm & viton valves ensures maximum chemical resistance. An important feature is that the pumps are mounted beneath the tank so it is flood primed, as opposed to some units which have the pumps mounted on top of the tanks above the liquid - which can cause problems with the pumps not priming.

Gun: Quality TeeJet spray lance with long extension to keep the spray away from you. Spray lance has a trigger lock & an adjustable nozzle to change the spray pattern from a wide cone to a straight jet. A length of self-store hose is included for spot spraying. The gun is stored in its own handy holder.

Wiring: 4mm twin core wiring loom complete with switchbox & alligator clips

for easy connection to the vehicle battery. The loom features a two-pin breakaway plug so that the loom doesn't need to stay with the sprayer.

Frame: Laser cut 3mm steel which is folded & welded for strength.

Finish: Frames are primed with etch primer & finished with the highest quality two pack paint for excellent chemical resistance & a hard rich finish.

Price List - All prices are inclusive of GST

100lt Unit - 7.6lt per min pump - \$877.00

200lt Unit - 13.6lt per min pump - \$1,260.00

400lt Unit - 13.6 lt per min pump - \$1,584.00

600lt Unit - 13.6 ltr per min pump - \$1,860.00

OPTIONS:

Booms can easily be mounted to any Junior Control Unit (note a mounting frame is required at \$155.00 incl GST to attach the boom to the tank unit, alternatively boom can be mounted independent of the unit).

- Firebreak boom, with fenceline nozzles & taps - \$330.00 incl. GST•
- Towbar boom, complete with nozzles - \$385.00 incl. GST •
 - 4m cross fold boom - \$924.00 incl. GST•
 - 6m cross fold boom - \$1,188.00 incl. GST•
- Single sided foam marker - \$880.00 incl. GST •
- Grain spray attachment - \$95.00 incl. GST •
