

'The Groundsman' the preferred sprayer for lawn care..

The Groundsman is a 100lt sprayer designed to be towed behind a ride-on lawnmower to spray large areas of lawn & around gardens. It features a spray-bar for covering large areas quickly, together with a spray lance and a length of self-store hose for spot-treatment of weeds - The Groundsman is the complete package.

Everything is included to get you spraying straightaway including tow pin, wiring loom, switchbox & battery clips. Simply hook The Groundsman up, clip the leads onto the battery & your away...

THE GROUNDSMAN COMES STANDARD WITH THE FOLLOWING FEATURES:

Boom: 1.5m spray-bar complete with TeeJet non-drip nozzle bodies - meaning when you switch the pump off, the nozzles instantly stop & don't keep dripping. The nozzle bodies have QJ Quickfit caps for correct automatic alignment of spray nozzles. Fitted as standard are TeeJet AIXR Low Pressure Air Induction Nozzles which are a low drift nozzle.

Tank: UV stabilized 100lt polyethylene tank with a large sump for complete drainage. Tank features a drain valve directly out of the bottom of the tank, which is important because you can easily drain any excess spray into another container & flush the system with clean water after use.

Filter: External TeeJet Suction Filter with mesh screen to guard against pump damage & clogged/blocked valves. An important feature is the isolation tap which allows the filter to be cleaned when the tank still has liquid in it.

Pump: Flojet 12 volt 7.6lt per min diaphragm pump. The pump features a pressure cut-out switch for on-demand spraying when using the spray lance (motor only runs when you activate the trigger) & an internal bypass for constant pressure when using the boom.

Gun: Quality TeeJet spray lance with long extension to keep the spray away

from you. Spray lance has a trigger lock & an adjustable nozzle to change the spray pattern from a wide cone to a straight jet. A length of self-store hose is included for spot spraying.

Wiring: 4mm twin core wiring loom complete with switchbox & alligator clips for easy connection to the mower battery.

Frame: Laser cut 3mm steel which is folded and welded for strength. Includes tow-pin for easy attachment to ride-on mower. Trailer is manufactured from 50x25mm RHS>

Finish: Trailer & boom are primed with etch primer & finished with the highest quality two pack paint for excellent chemical resistance & a hard rich finish.

The Groundsman is priced at only \$1,640.00 incl. GST

Price includes fenceline jets with taps to give a spray width of over 4—5m.

**Imagine having the best lawn in your street...
With the Groundsman your neighbours will be green with envy!**
